

Violetta Vylegzhanina

email: violetta.vylegzhanina3@gmail.com

- EDUCATION ♦ **M.Sc., Vanderbilt University**, Computer Science Dept., USA. *Dec'15*
 GPA: 4.0/4.0.
- ♦ **B.S., Vanderbilt University**, Computer Science Dept., USA. *May'13*
 GPA: 3.7/4.0.
- WORK ♦ **Oath (Yahoo!)**, *Sr Software Dev Engineer*. *Oct'18-Present*
- EXPERIENCE · Building a highly scalable and robust next generation Big Data stack to power data processing needs.
- ♦ **CBS Interactive**, *Software Engineer*. *May'17-Aug'18*
- Worked with leading edge technologies to deliver scalable and reliable high performance API systems to millions of unique users per month.
- Implemented custom monitoring services via Amazon CloudWatch.
- Researched, evaluated, and applied new processes and methods to enrich existing applications.
- Developed JUnit and Mockito test cases to improve code coverage.
- Contributed to development of automation solutions that improve build and deployment systems and support continuous deployment/integration.
- Contributed to the AWS migration of a product by evaluating technologies for efficient and secure storage and retrieval of sensitive information (e.g. Consul, Vault, AWS Parameter Store).
- Designed and implemented an algorithm that significantly simplified code and reduced the execution time of a web feed parser by 50%.
- ♦ **HITactics, Inc.**, *Software Engineer*. *Sep'15-May'17*
- Provided high quality software services for indoor positioning and asset tracking solutions that relied on heterogeneous components, such as IoT.
- Designed and developed a customizable and scalable event-driven system that processed realtime data streams (e.g. Amazon Kinesis) for purposes such as monitoring, analytics, and notifications.
- Designed and developed a set of secure Portal REST APIs that simplified retrieving and modifying server data.
- ♦ **Change Healthcare**, *IT and Information Security Intern*. *May'15-Aug'15*
- Saved several months of manual work by developing a tool that instantly documented 4,000 of attack characteristics.
- Lead the project to prevent the company's websites against online phishing attacks.
- Performed dynamic assessments of client-facing applications and provided remediation strategies for detected vulnerabilities.
- ♦ **Institute for Software Integrated Systems**, *Research Assistant*. *May'13-May'15*
- Conducted research on system security and improvement of Java applications' effectiveness through remediation of security flaws.
- Detected security flaws using machine learning WEKA library¹.
