EDUCATION

◇ **M.Sc., Vanderbilt University**, Computer Science Dept., USA. ***Dec'15***
  <u>GPA:</u> 4.0/4.0.

◇ **B.S., Vanderbilt University**, Computer Science Dept., USA. ***May'13***
  <u>GPA:</u> 3.7/4.0.

WORK EXPERIENCE

◇ **CBS Interactive**, *Software Engineer*. ***May'17-Present***

· Working with leading edge technologies to deliver scalable and reliable high performance API systems to millions of unique users per month.

  – Developing a QA Automation framework to save efforts on manual testing.
  – Investigating a product redesign that utilizes microservices architecture to satisfy modern business demands.
  – Contributed to the AWS migration of a product by evaluating technologies for efficient and secure storage and retrieval of sensitive information (e.g. Consul, Vault, AWS Parameter Store).
  – Designed and implemented an algorithm that significantly simplified code and reduced the execution time of a web feed parser by 50%.

◇ **HITactics, Inc.**, *Software Engineer*. ***Sep'15-May'17***

· Provided high quality software services for indoor positioning and asset tracking solutions that relied on heterogeneous components, such as IoT.

· Designed and developed a customizable and scalable event-driven system that processed realtime data streams (e.g. Amazon Kinesis) for purposes such as monitoring, analytics, and notifications.

· Designed and developed a set of secure Portal REST APIs that simplified retrieving and modifying server data.

◇ **Change Healthcare**, *IT and Information Security Intern*. ***May'15-Aug'15***

· Saved several months of manual work by developing a tool that instantly documented 4,000 of attack characteristics.

· Lead the project to prevent the company's websites against online phishing attacks.

· Performed dynamic assessments of client-facing applications and provided remediation strategies for detected vulnerabilities.

◇ **Institute for Software Integrated Systems**, *Research Assistant*. ***May'13-May'15***

· Conducted research on system security and improvement of Java applications' effectiveness through remediation of security flaws.

  – Detected security flaws using machine learning WEKA library[1].
  – Optimized method tracing by intercepting specific method calls at run-time to reduce noisy data.

· Developed an Android app that deals with often changing unstructured data to ease the shopping experience of WIC (Women, Infants, and Children).

  – Improved integration among mobile health solutions using *Open-mHealth*[2] and MongoDB database on Amazon EC2 that stores purchase data.

---

[1] http://www.cs.waikato.ac.nz/ml/weka/
[2] http://www.openmhealth.org/

    – Developed data analytics solutions for shopping choices data stored in SQLite database to provide healthy tips that are customized for each user.

◇ **Schneider Electric**, *Engineering Intern*.   ***Dec'11-Apr'13***

    · Lead the reconstruction of test environment with automated test units in .NET.

    · Integrated unit tests with the software development cycle.

In *Proceedings of the 2013 ACM Workshop on Mobile Development Lifecycle*, MobileDeLi '13, pages 21–26, New York, NY, USA, 2013. ACM. ISBN 978-1-4503-2603-2. doi: 10.1145/2542128.2542135

SKILLS

◇ *Languages:* Java (expert), C# (proficient), C++ (prior experience), JavaScript (prior experience), Python (prior experience).

◇ *DevOps:* Bamboo, Docker, Gradle, Git (GitHub/GitLab), JIRA, JUnit, Maven, Terraform, Vagrant.

◇ *Frameworks:* Spring, Retrofit, Hibernate, Vaadin, GWT.

◇ *Software:* Eclipse, IntelliJ IDEA, Visual Studio, Android Studio, HP WebInspect, Acunetix, HP Fortify on Demand.

◇ *Databases:* MySQL, PostgreSQL, MongoDB.

◇ *Cloud Computing:* Amazon Web Services (AWS).

AWARDS

Tau Beta Pi, Vanderbilt University, 2013.

HOBBIES

Interior design, playing piano & violin, embroidery, cooking, and gardening.
